Subject: RE: Removal of Riparian Vegetation

Jane,

I have not approved the delineation, so this project cannot move forward. DSL does not regulate vegetation removal in wetlands unless soil is being disturbed when removing roots (normal must exceed 50 cubic yards of soil). I am very aware of the issues you brought up. In early May I requested additional information and an expansion of the study area that will match the impact area. I am also aware that the wetland land use notice and the cover sheet of the delineation report do not coincide with respect to the project intended for that site. I am still waiting to hear back from the wetland consultant who produced the report, but so far nothing has come forth.
Lynne
